## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12, drawn to apparatus for determining the condition of a region of tissue comprising a cup or housing having first and second openings, an electrode and a source of suction, classified in class 600, subclass 372.
  - II. Claims 13-36, drawn to methods and apparatus for determining a condition of breast tissue or the location of a tumor using a pair of electrodes, classified in class 600, subclass 547.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination, respectively.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed would operate effectively without the source of suction and cup-type housing configuration required by the claims of the subcombination. The subcombination has separate utility such as an apparatus for stimulating and collecting milk samples from a mammary breast duct.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Thomas M. Palisi on January 9, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles A. Marmor, II whose telephone number is (571) 272-4730. The examiner can normally be reached on M-TH (7:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (571) 272-4726. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
